

VYTIS SHIELD

CLOSING THE GAP IN INFECTION PREVENTION

A *Unique* Antimicrobial Surface Coating Technology that we provide to protect and prevent against infection. Our one-time treatment service is guaranteed for one year, with a 99.13% reduction in bioburden. In these times, our service not only protects but also provides a peace of mind for staff, customers, patients, and anyone entering your facilities that the surfaces are safe!

- Patented and EPA registered to inhibit the growth of fungi & bacteria
- Based on advanced silane chemistry
- Vytis Shields' unique electrostatic deployment system allows us to not just coat, but almost completely engulf the object being treated
- Traditional antimicrobials provide short-term kill of microorganisms. Unlike disinfectants, sanitizers & bleaches, the water based Vytis Shield forms a molecular bond to surfaces
- The molecule disrupts the cell membrane of harmful fungi & bacteria, inhibiting, reducing & providing long term residual kill.
- Vytis Shield can produce a durable, non-migrating, non-leeching, microbial finish to a wide range of hard surfaces & textiles
- The physical, rather than chemical, mode of action of Vytis Shield does not affect normal skin flora, does not lose strength with use & does not promote adaptive organisms

Protect

Disinfection:

Our hospital-grade disinfectant is EPA registered to effectively kill organisms including viruses, bacteria, yeasts, mold, SARS, and CoV-2.

Prevent

Surface Coatings:

A disinfected surface is only clean until it comes into contact with the next particle or contaminant. Our Surface Coatings continue to provide a 99.13% reduction of bio-burden on all treated surfaces for up to one year, with hospital proven results.

Prevail

Sustained Results:

Prior to Vytis Shield application, baseline testing is performed to analyze your existing conditions. Within two to four weeks, we will perform post-treatment testing to show the impact Vytis Shield has made in your facility or home.

Who do we service?

Healthcare

- Hospitals
- Surgi-Centers
- Physician Offices
- PT Offices
- Veterinary

Industrial

- Food Processing
- Manufacturing

Commercial

- Offices/ High Rises
- Restaurants/ Fast food
- Adult/ Child Care
- Hotels/ Rentals/ Apts
- Apartment Buildings
- Schools
- Retail

Vytis Shield represents the most advanced and forward-thinking product in the field today and we are proud to bring ours to market!
